

## Indices to Volume 10 of the Policy Studies Review

The following indexes of authors and subjects cover the issues of the tenth volume of the *Political Studies Review*. Each page is designated by a volume number (which is a Roman numeral) and a page number (which is an Arabic numeral). The issues cover a variety of topics by way of their symposia, non-symposium articles, literature reviews, and professional developments or news and notes. The symposia especially deal with (1) "Whither Public Policy? Liberalism, Conservatism, and Social Change," (2) "The Comparative Politics of Local Economic Development," and (3) "Development of Nuclear Waste Policy."

The index of authors covers authors of articles, authors of books reviewed, and reviewers of books, but not names referred to in the articles. The index of Subjects mainly covers the basic concepts included in the titles and subtitles of the symposia and non-symposium articles, plus the titles of books reviewed. The bodies of the articles and book reviews were also consulted to clarify the concepts derived from the titles. The page number after each concept is generally the first page of the main page on which the concept is discussed. The discussion may be continued on subsequent pages as well. Future annual indexes will appear in the first issue of each volume to cover all issues in the previous volume.
